Lithium plant opposition

This is the most ridiculous thing Iâ€™ve ever heard of in my life! To actually put a lithium battery factory or plant anywhere in a community where there is public housing and schools, is the most ridiculous proposal I have ever heard of in my entire life. This is a total hazmat accident waiting to happen. If this battery plant is allowed to be built, this could create all types of deadly results from cancer causing pollution to lithium leaks in the soil to an entire reduction in property values within a 20 mile radius of this plant. Remove this proposed plan immediately! There are far too many other locations in Southern California that are not anywhere near residential homes.
