## **Opposition to Proposed Compass Energy Storage Project (24-OPT-02)**

I strongly oppose the proposed BESS facility.

This facility would use technology that is a known fire risk, increases the state's homeowner's insurance crisis, is a significant health risk to first responders and nearby residents in the case of a fire, poses a large environmental risk in an area designated as Open Space by the city and its residents and would impact several waterbeds leading to the ocean.

We have lived for years in the shadow of the nuclear power plant in San Onofre, now in the process of being decommissioned. Given the significant infrastructure investment and capabilities, could not this provide a better alternative?
