Discontent with the proposed Dangerous Lithium Battery Facility

While I recognize that we live in an environment with increasing energy needs, the site selection for the proposed battery facility is not appropriate. This site is proposed to service 250k homes, and is set in a community that has less than 15k homes. This dangerous facility should be positioned in a more remote and secluded location that won't impact the equestrian communities, proximity to the creekbed, important cultural landmarks (Putuidem Village, and Mission San Juan Capistrano), as well as the inherent fire danger that it presents to us residents in the immediate vicinity, including SJC, Laguna Niguel, Aliso Viejo, and Mission Viejo. The proposed location is inappropriate for this area, and it seems as though other suitable locations have been overlooked. I implore you to explore other avenues outside of this location.
