Oppose battery plant

I am opposed to the installation of the proposed battery plant planned for south Orange County. The health effects of this magnitude of energy is unknown & it is unnecessary to build this type of plant in the densely populated region of south Orange County. Please provide the health studies and environmental impact studies that have been completed for this plant. When were public meetings held? What is the impact to the environment as well as long term impacts to residents in the area.

I look forward to attending the community meetings regarding this project.
