Absolutely OPPOSED

This project is sickening, and eats up the last open area available around here. Not to mention any environmental impacts. There is plenty of open space not in the heart of San Juan Capistrano, and that needs to be explored rather than impacting the community with this project. The city does not want you here, yet you went above their heads and continued to push for something that is clearly not wanted in this area. Please consider the people this is affecting and do not allow this project to continue.
