Say NO to allowing the building of a lithium ion battery storage facility in San Juan Capistrano

Please do not allow a Lithium Ion Battery Bank to be built in San Juan Capistrano!!! This fire hazard is not welcome here. There are places where this would be appropriate to build, but it is not here amongst our dense population surrounded by hills of chaparral. FIRE is a valid concern—especially as insurance carriers are dropping customers and raising prices—and some have abandoned CA all together. See Escondido facility burning RIGHT NOW! Evacuations are in order—please don't allow this facility!
