San Juan Capistrano battery facility

I am writing on behalf of the concerned residents of San Juan Capistrano to express our strong opposition to the proposed battery facility in our city. The community has made it abundantly clear that this facility does not align with the interests, safety, or vision for the future of San Juan Capistrano.

The city council, alongside many residents, has voiced consistent opposition to the project. San Juan Capistrano is a unique, historic community that values its small-town atmosphere, environmental preservation, and quality of life. We believe that introducing a large-scale battery facility poses significant risks to these core values.

Concerns include potential environmental hazards, the proximity of the proposed site to residential areas, and the impact on local infrastructure. The community has not been adequately consulted, and our concerns about safety, noise, and long-term environmental impact have not been addressed to our satisfaction.

While we understand the importance of advancing clean energy infrastructure, we firmly believe that this facility is not suitable for San Juan Capistrano. The city has spoken clearly in opposition, and we ask that you respect our community's wishes and explore alternative locations that do not conflict with local interests and values.
