Opposed to Battery Storage System Project Location

I am deeply opposed to the location of the Proposed Battery Storage Project. There are many risk due to the location of this project that will put people in harm due to the following:

Fire

Terrorism

Noise

Unmanned with no standards in place or guidelines for this facility

Several homes and elderly homes are nearby which could put hundreds of families in jeopardy of losing their lives and homes.

If this location is caught on fire it will take down the main highway between LA to San Diego (Interstate 5)

Please submit my letter to oppose this project.
