Opposed to Energy Storage Project

I am opposed to the Compass Energy Storage Project. Usage of lithium iron batteries (or similar technologies) poses a fire safety and potentially other risks to personal property, public space and citizen life and/or well-being. This project is too closely located to well-populated areas, open spaces with typically dry brush and a major freeway thoroughfare. Any type of fire or other hazardous material event will have a negative impact on public safety.

Thank you,
Mark Chiaverini
