

DOCKETED

Docket Number:	23-IEPR-03
Project Title:	Electricity and Gas Demand Forecast
TN #:	260166
Document Title:	2023 Demand Scenarios Project - Aleecia Gutierrez
Description:	N/A
Filer:	J Padilla
Organization:	California Energy Commission
Submitter Role:	Commission Staff
Submission Date:	11/19/2024 3:03:33 PM
Docketed Date:	11/19/2024

Staff Workshop on Demand Scenarios Project

November 20, 2024

Instructions

- Workshop is being conducted remotely via Zoom
 - Workshop is being recorded
- Attendees may participate in the workshop by:
 - Making comments during public comment period
 - Submitting written comments due **December 4, 2024**
- Questions and comments can be entered in the Q&A section of the Zoom application

Demand Scenarios Project Role

- The California Energy Commission initiated this Project during the 2021 Integrated Energy Policy Report (IEPR) cycle, with initial public engagement on the December 2, 2021, IEPR Workshop.
- The analysis, scenarios, and results were presented publicly in a workshop on April 7, 2022.
- Demand scenarios provide assessments primarily using CEC forecasting tools and methods.
- These assessments contribute to understanding implementation challenges of meeting statutory GHG emission reduction goals.
- Identifying these implementation challenges are necessary for energy agencies to conduct their own processes to develop resource commitments that will be needed to achieve California's goals.

Workshop Schedule

- Demand Scenarios Project Overview
- Building Scenarios
- Industrial Modeling
- Transportation Energy Demand
- PV & Storage Scenarios
- Methodology, Overview, Inputs and Assumptions
- Scenario Insights
- Questions
- Public Comment
- Adjourn
