## **Proposed Battery Storage**

Please reconsider this battery site. As you know this proposed area is surrounded by brush and our biggest enemy is fire danger. Fire travels fast uphill where many homes are and the results could be catastrophic should a fire occur. I understand the initial fire cannot be extinguished by water and you have to let it burn, creating toxic air for us to breathe. Many insurance companies are leaving the area exposing us further. Please move the storage to a better location like the desert. I think it criminal that you are exposing communities to such a danger.
