## **Include dual heat pump dryers**

Hopefully phase II of HEERA for single family homes will include heat pump dryers, such as the dual inverter/compressor model offered by the AG appliance company. We have ordered one of these. If installed after the phase II rebates are offered, will it still qualify? When do you anticipate activating phase II?

Given that the IRA funds are likely to be rescinded or blocked when the new federal administration takes over in January, it would be best to get these funds out the door before then. It would be a travesty to go through the two years of setting up the program, then have it blocked.
