What Inflation Reduction Act

Middle and low income California residents have waited two years for our State to come up with a program that helps to reduce costs for residents to switch to cleaner energy, make their homes more livable, and reduce reliance on fossil fuel. Those of us who needed the rebates to order afford to pay for cleaner appliances, no longer have to worry. President elect Trump said this morning he "will claw back the remaining funds from the Inflation Reduction Act"! Good, we can all breath easier and just stick with our old gas stoves and propane furnaces. Thanks Governor Newsom and anyone who received a salary for the two years they spent getting nothing done. You have hurt the residents of my State and shot yourself in the foot!. Good job. Aim higher next time and get something done in a timely manner!
