Please stop the proposed Lithium Plant in San Juan Capistrano Ca

I live in Laguna Niguel, which is upwards from the proposed lithium plant proposed in San Juan Capistrano Ca

There are many things that can spark a fire in the plant, that cannot be extinguished thus devastating any nearby communities like Laguna Niguel where I live.

You must keep in mind the recent Los Angeles fires, which are very difficult to extinguish. Lithium fires are almost impossible to extinguished.
Please nip the plant in the bud before you set terrible destruction in motion.
