Opposition to Compass Energy Storage Project

We are writing in opposition to the Compass Energy Storage Project BESS facility. In the wake of the recent fires in Los Angeles County and several previous fires in Southern California that have been caused wholly or partly to energy and battery storage, in addition to the recent Moss Landing lithium battery storage plant in California causing detrimental fire damage and toxic air to local residents and wildlife, this facility cannot be built in the proposed location. Its proximity to flammable vegetation, wildlife, and residents poses a significant threat to residents in Orange County.

In the event of a severe accident or mismanagement of facilities, several lawsuits would be anticipated to be filed against multiple defendants that would be involved.
