The California Energy Commission (CEC) will host a pre-rulemaking workshop on the refinery resupply provisions of Assembly Bill (AB) X2-1 (Stats. 2024, 2nd Ex. Sess. 2023-2024, ch. 1) and Senate Bill (SB) X1-2 (Stats. 2023, 1st Ex. Sess. 2023-2024, ch. 1) followed by the second meeting of the Independent Consumer Fuels Advisory Committee (ICFAC). The pre-rulemaking workshop will discuss the framework for rules to manage refinery resupply requirements pursuant to Public Resources Code section 25354.2. The ICFAC meeting will discuss implementation of AB X2-1, including discussion of potential refinery resupply requirements.

The public can participate in both the workshop and ICFAC meeting consistent with the attendance instructions below. The CEC aims to begin promptly at the start times posted and the end times are estimates based on the proposed agenda. The workshop and ICFAC meeting may end sooner or later than the posted end times.

Agenda

Session 1: Pre-Rulemaking Workshop on Refinery Resupply Planning

This workshop will discuss the framework for potential CEC regulations or guidelines, or both (rules), to implement refinery resupply requirements as provided for in the Petroleum Industry Information Reporting Act of 1980 (PIIRA), as amended by AB X2-1 and SB X1-2. As relevant to this rulemaking, SB X1-2 increased the data collection and analysis provisions in Public Resources Code section 25354 and authorized the CEC to develop rules to manage necessary refinery maintenance and turnarounds pursuant to Public Resources Code section 25354.2. AB X2-1 further outlined the CEC's authority to manage refinery maintenance and turnaround, including the authority to establish requirements regarding refinery resupply planning.

Staff will provide a market update as well as an overview of the proposed framework for the rules in this phase of the rulemaking proceeding. A consultant will present on the benefits, costs, and considerations for a resupply requirement. The Division of Petroleum Market Oversight will provide additional background on a potential resupply requirement and its relationship to gasoline supply reliability.

Session 2: Second Meeting of the Independent Consumer Fuels Advisory Committee

During the ICFAC meeting a consultant will present an overview of California's petroleum supply and market.

Roundtable Discussion. The ICFAC members will participate in a roundtable discussion and share thoughts on the implementation of AB X2-1, including potential refinery resupply requirements.

A detailed schedule for each session will be posted prior to the workshop available on Docket [25-PIIRA-01](https://efiling.energy.ca.gov/Lists/DocketLog.aspx?docketnumber=25-PIIRA-01) at <https://efiling.energy.ca.gov/Lists/DocketLog.aspx?docketnumber=25-PIIRA-01> and Docket No. [23-ICFAC-01](https://efiling.energy.ca.gov/Lists/DocketLog.aspx?docketnumber=23-ICFAC-01) at <https://efiling.energy.ca.gov/Lists/DocketLog.aspx?docketnumber=23-ICFAC-01>.

Background

AB X2-1, which took effect on January 13, 2025, requires the CEC to consider the effects of refiners' inventory on the price of transportation fuels in California. The bill authorizes the CEC to develop requirements for refiners operating in the state to maintain minimum levels of inventories and to plan for resupply of lost production during planned maintenance or turnarounds. AB X2-1 builds upon SB X1-2, which aims to improve transparency into the petroleum industry and prevent consumer price spikes.

The CEC administers Petroleum Industry Information Reporting Act of 1980 (PIIRA), which requires certain petroleum industry companies to submit weekly, monthly, and annual data to the CEC. Analysis of data collected under PIIRA is an important part of the CEC's responsibility to create a thorough understanding of the operations of the petroleum industry in California. SB X1-2, which took effect in June 2023, amended PIIRA and added other requirements associated with the CEC's oversight of the petroleum industry. Among other things, SB X1-2 revised and introduced several new petroleum industry reporting requirements, with submittals beginning in July 2023. The new information includes spot market transactions, firm ownership, agreements and contracts, inventory holdings by type, refinery maintenance schedules, notice of marine vessel imports, expanded refinery operator reporting, and new pipeline and port operator reporting. SB X1-2 also authorized the CEC to regulate the timing of refinery maintenance and turnaround.

The CEC is working with the members of the refining industry, labor, community advocates, environmental justice advocates and others to implement both laws. The CEC is taking a comprehensive approach to see what measures may stabilize supply and help to curb gas price spikes. The CEC is committed to ensuring there is a safe, reliable, affordable, and equitable supply of transportation fuels during the transition to a clean energy future.
