## **Natural Gas Transition Suggestion**

Good afternoon, and thank you for taking my comment.

As a homeowner in San Diego County, natural gas is critical to not only my home, but all of my neighbors as well. I understand that the state is looking for alternatives. If the state decides to head in this direction, and in order to not cause burdensome economic consequences for millions of people and future generations, I think we should do everything in our power to maintain (and upgrade) our current natural gas infrastructure while exploring natural gas alternative fuels like e-NG, hydrogen, RNG, natural gas blends, or a combination therein.

Thank you for your time.

Respectfully,  
Burke Mills
