**EnergyPro 9.4 Compliance Software  
Approval by the Executive Director  
Docket # 22-BSTD-02, Approval # 25-021925**

The Executive Director of the California Energy Commission (CEC) hereby approves EnergyPro 9.4 as an update to EnergyPro 9.0, which incorporates the new versions of California Building Energy Code Compliance (CBECC) and CBECC residential (CBECC-Res) compliance managers, pursuant to Sections 1.2.1 and 1.3.2 of the 2022 Alternative Calculation Method (ACM) Approval Manual.

On December 14, 2022, the CEC approved EnergyPro Version 9.0 as an alternative calculation method for demonstrating performance compliance with the nonresidential, multifamily, and residential provisions of the 2022 Energy Code. When the CEC approved EnergyPro 9.0, it directed the Executive Director to take actions including “reviewing and approving updates to vendor software, consistent with Section 1 of the 2022 ACM Approval Manual.”<sup>1</sup>

On January 30, 2025, the CEC approved revised public domain software, CBECC 2022.3.2 and CBECC-Res 2022.3.2, for estimating energy consumed by nonresidential, multifamily, and residential buildings under Public Resources Code section 25402.1(a), for demonstrating compliance with the performance-based provisions of the 2022 Energy Code.

On February 5, 2025, EnergySoft, LLC applied to the CEC for approval of EnergyPro 9.4 as an update to its Energy Code compliance software, which incorporates the compliance managers of CBECC 2022.3.2 and CBECC-Res 2022.3.2. CEC staff has determined that the application was complete and contained the elements required by Section 1.1 of the 2022 ACM Approval Manual. Therefore, EnergySoft, LLC has met all the requirements necessary to approve their application.

Information for obtaining EnergyPro 9.4 is posted on the CEC’s [2022 Energy Code Compliance Software webpage](https://www.energy.ca.gov/programs-and-topics/programs/building-energy-efficiency-standards/2022-building-energy-efficiency-1) at <https://www.energy.ca.gov/programs-and-topics/programs/building-energy-efficiency-standards/2022-building-energy-efficiency-1>.
