Webinar Notice for the Fast Charge California Project

Additional submitted attachment is included below.

Intro to the Fast Charge California Project

March 26, 2025

10:00 a.m. to 11:30 a.m. PDT

CALeVIP is providing **\$55 million** in incentives to help property owners, businesses and charging providers install high-power DC fast chargers at publicly accessible locations statewide through the **Fast Charge California Project**. Join us for this important webinar to ensure your readiness to apply for the project when the application window opens in July.

Key project details include:

- Incentives can cover up to 100% of installation costs up to \$100,000 per charging port.
- Proposed installations must be “ready to build” at time of application, with a final utility service design and an issued permit.
- Sites in disadvantaged communities (DACs) and low-income communities (LICs) are NOT REQUIRED, but DAC/LIC and tribal applications that meet ready-to-build requirements will be prioritized.

Applications will be accepted on a **first-come, first-served** basis during the application window of **July 8 – Sept. 30, 2025**.

For full program guidelines, refer to the implementation manual available on the CALeVIP [Upcoming Rebates](#) webpage.
