**CALIFORNIA  
ENERGY COMMISSION**

August 29, 2025

Kelene Strain  
Environmental and Permitting Manager  
Capstone Infrastructure Corporation  
155 Wellington Street West, Suite 2930  
Toronto, Ontario, Canada  
M5V 3H1

**Determination of Complete Application for Potentia-Viridi Battery Energy Storage System (24-OPT-04)**

Dear Kelene Strain:

This letter is to notify you that the California Energy Commission (CEC) staff has completed its review of Levy Alameda, LLC's most recent supplemental application filings and all prior project application submittals pursuant to Public Resources Code, section 25545.4 and California Code of Regulations, title 20, section 1878. Based on this review, and in consideration of the totality of the record present in the project docket, CEC staff has determined that the submitted application complies with Public Resources Code, section 25545.2, and deems the application complete.

The fact that an application is deemed complete does not mean the proposed project will be approved, will be found to meet all the requirements of Public Resources Code, sections 25545 through 25545.13, or that the CEC staff's independent information gathering activities have ended.

The CEC will determine whether to approve or deny the proposed project within 270 days of this notice, or as soon as practicable thereafter, consistent with Public Resources Code, section 25545.4(e). Pursuant to Public Resources Code, sections 25545.6 and 25545.7, CEC staff will review the application, consider other independently derived information, prepare a staff assessment that includes an environmental impact report, and prepare a recommendation on whether to approve or deny the proposed project for consideration at a CEC business meeting.

CEC staff will continue to conduct independent analysis through consultation with experts in relevant fields and other public agencies, and by consulting with California Native American Tribes. Staff will also consider information filed in the docket and presented at noticed public events to ensure a thorough analysis and supported conclusions.

Determination of Complete Application  
Potentia-Viridi Battery Energy Storage System (24-OPT-04)
