## **OCPI version and support**

Some additional information regarding OCPI and your proposal:

- Indeed OCPI 2.3.0 is the version to go for as earlier versions are not compatible with NA situation (e.g. regarding taxlevels, and support for different vehicle types and support for disabled person access).
- Coming weeks migration tools and document will be made free available to migrate from v2.1.1 and 2.2.1 to version 2.3.0. That way the move to 2.3 should not be a big problem anymore.
- Conformance tests for 2.3 will be ready app September 2026.
- Full formal certification is work in progress but will most likely be ready end of this year, early next year.

If needed the EVRoaming Foundation can speed up processes for certification if requested.
