For each category, the percentage of Green Mountain Energy Company Projected 2003 was within ± 5 percentage point of the actual percentage.

For specific information about this electricity product, contact Green Mountain Energy Company. For general information about the Power Content Label, contact the California Energy Commission at 1-800-555-7794 or www.energy.ca.gov/consumer.

- Customers who choose Green Mountain Energy[®] electricity products do not have electricity from a specific generating facility delivered directly to their homes, but they are able to support generators of renewable energy that provide electricity to the region's power system in an amount equal to the customers' usage.
- The power blend information provided describes the purchases of *Green Mountain Energy* electricity products over the course of a calendar year. For each calendar year or portion thereof that a customer purchases *Green Mountain Energy* electricity products, we deliver to the grid enough power from the appropriate resources to match that customer's energy usage during that period. These deliveries are subject to verification in accordance with the requirements of the California Energy Commission *Power Source Disclosure and Customer Credit Programs' Annual Reporting Requirements*.
- Renewable resource availability varies from hour to hour and from season to season, as does our customers' use. At any specific time, we may put more or less of these energy sources into the grid than our customers' use. We put system power into the grid to serve our customers' minute-by-minute consumption, but match our customers' annual electricity use by delivering our energy blend resources into the grid. At all times, our customers' electricity needs are served.
- Electricity purchases for Breathe Easy Payment Plansm include at least 10% energy generated from new renewable resources. New renewable resources mean that these facilities began commercial operation on or after January 1, 1997.
