Dear Vernon Customer:

Senate Bill 1305 (SB 1305) requires all municipal utilities, as it does all other electric service providers, to disclose information to their customers regarding the energy resources used to generate the electricity they sell. In order to comply with the mandates of this legislation, the City of Vernon's Light and Power Department adopted the "Power Content Label" created by the California Energy Commission. The label below provides Vernon customers with information about the energy resources used to generate the electricity that is sold by the City of Vernon's Light and Power Department. An updated "Power Content Label" will be mailed to you quarterly.

Note that the Vernon power mix shown below is the same as that of the 2004 California Power Mix. This is a "default" projection that may be used by providers such as Vernon that do not claim to provide a higher percentage of renewable energy resources than the California Power Mix. If you have questions regarding this information, please contact Daniel E. Garcia, at 323-583-8811, extension 312.
