Subject: Sun Valley Energy Project (05-AFC-3) Letters From the Public

Previously we have received forty (40) letters regarding the Sun Valley Energy Project.

Attached to this memo are 8 more letters that are positive in support of the project. These all site the need for new sources of electrical power to prevent power problems such as blackouts, .and to support additional growth in the area, both residential and business

March 20, 2006

Robert Worl
California Energy Commission

Sacramento, CA 95814I

Dear Mr. Worl:

I support the construction of the Sun Valley Power Plant by Edison Mission Group and hope you do as well. The Romoland project would generate about 500 megawatts, that's enough electricity to power thousands of air conditioners during the hot summer months when our energy grid is stretched thin.

Our region needs this power and the jobs and taxes generated from this project.

Newspapers, such as The Press-Enterprise, support development of new sources of electricity and so do I.

Please join me in supporting the Edison project.

Thank you for your consideration.

Sincerely,

30378 Napa St.

Sacramento, CA 95814

Dr. Mr. Worl:

Please approve the proposed Edison Mission Energy power plant in Romoland. The Sun Valley Power Plant would help meet the needs of our fast-growing area by providing power when we need it most, during the summer when people are running their air conditioners.

Our fast-growing area needs new roads and new sources of water and power. This would be a key piece in the puzzle.

The proposed power plant will be used when energy is critically low and is powerful enough to run 165,000 home air conditioners. That means a lot to those of us who need air conditioning to help get through the hot summer months.

Please consider approving the project so that we have a stable source of power during the hot months when demand stretches our energy system.

Regards,

Sarah Clayer

Sacramento, CA 95814

Dear Mr. Worl,

Unfortunately, our power supply has not kept pace with the current and projected growth of homes and businesses in Riverside County. To avoid the rolling blackouts of a few years ago and the threat of more in the future, we need the Sun Valley power Plant proposed by Edison Mission Energy.

The blackouts of 2000 and 2001 have not been forgotten. I know that I do not want them to happen again. This is why we need Edison's proposed power plant.

Since Edison is will to invest \$250 million into our region, I see no better solution than to approve their project and insure our economic future is served by a steady source of power. t

Therefore, I endorse Edison Mission Group's Peak-Load Power Plant in Riverside County and hope you do as well.

Cordially,

Gene P. Stone

Mr. Worl:

If our region is to be able to grow and support new homes and businesses, we need more sources of electricity, such as the project proposed by Edison Mission Group to avoid future blackouts.

The project in Romoland would not only produce electricity when demand is highest, but also jobs and tax revenue. It would mean a great deal for my community if the power plant was approved.

Please support this project before we face another electricity shortage like the one we saw only a few years ago.

Thank you for your time.

Respectfully,

Lense Peely

Sacramento, CA 95814

I am writing to lend my support for the approval of the proposed Sun Valley Power Plant by Edison Mission Group in Romoland. As a longtime resident of the Inland Empire, a project such as this would help the economic growth of the area while insuring a steady power supply for the Inland Empire.

As mentioned in The Press-Enterprise article published Nov. 30, 2005, the Edison project would generate 500 megawatts and prevent blackouts during peak energy demand when air conditioners are running or when there is a power-grid emergency.

The project would also create about 200 construction and full-time jobs and generate millions of dollars for our local community.

I urge you to vote in support of the Sun Valley Energy Project.

Sincerely,

8208 Parry Dr.

Sacramento, CA 95814I

Dear Mr. Worl:

Please approve construction of the Sun Valley Power Plant being built by Edison Mission Group. The Romoland project would generate enough power to run 165,000 air conditioners during our hot summers and prevent blackouts like the ones we had in 2000 and 2001.

This project will generate much needed electricity, jobs and taxes in a fast growing region that needs all three.

Please support the Edison project so that we have a steady supply of electricity to keep the lights on and the air cool.

I hope you approve the project.

Thank you for your consideration.

Sincerely,

March 14, 2006

Robert Worl
California Energy Commission
1516 Ninth Street,
Sacramento, CA 95814I

Dear Mr. Worl:

Please support the development of the Sun Valley Power Plant by Edison Mission Group. The Romoland project would generate energy that will be used during electricity shortages, such as when people run their air conditioning in the summer months.

The power plant project would also produce jobs and tax revenue for the region's economic future.

Please pass approval on the Edison project so we do not have to again experience blackouts like we did in 2000 and 2001.

Thank you for you time.

Sincerely,

STEVEN MARKAN
