In the Matter of:

Application for Certification for the Sun
Valley Energy Project

DOCKET NO. 05 AFC-03

STATUS REPORT NO. 1

In accordance with the Siting Committee Scheduling Order dated March 6, 2006, Edison Mission Energy (EME) hereby files its Status Report No.1 to assist the Committee in determining if satisfactory progress is being made with the licensing of the Sun Valley Energy Project (SVEP) and to bring potential schedule delays or other relevant matters to the Committee's attention.

Air Quality

As the Committee is aware, the SVEP plans to participate in the South Coast Air Quality Management District (SCAQMD) Priority Reserve Program. Rule 1309.1, which establishes and implements the Priority Reserve Program, is currently being amended. The SCAQMD has indicated that the amendment process is currently on schedule for a July 7, 2006 adoption. EME believes that the SCAQMD will issue its Preliminary Determination of Compliance (PDOC) by June 1, 2006.

As part of its data requests, Staff has asked for, and EME has committed to provide, periodic updates regarding the Rule 1309.1 amendment process and EME's progress on obtaining offsets. The first of these updates will be filed on May 1, 2006.

Riverside County

EME has filed an application with Riverside County, which would enable the County to issue an advisory Conditional Use Permit. We expect the County to provide guidance to Staff in order to support the current schedule for preparation of the Preliminary Staff

Assessment.

Response to Data Requests

EME is currently preparing its responses to Staff's first round of data requests, which will be filed on Monday, April 17, 2006.

Conclusion

EME has been working cooperatively and diligently to respond to the various data requests and other requests for information that have been received from Staff. EME is committed to working with the CEC, Riverside County, and SCAQMD Staff to successfully meet each of the milestones that have been set forth in the Scheduling Hearing Order in support of the AFC review process.
