Re: California Energy Commission
Response to DRAFT Amendments to Appliance Efficiency – External Power
Supplies - Conair Corporation comments
California Code of Regulations, Title 20, Sections 1601-1608
Docket No. 06-AAER-1

Dear Mr. Holland and the Committee:

Please accept these comments with regard to the proposed amendments to the subject appliance efficiency regulations on behalf of Conair Corporation.

We note that the Commission now proposes to delay the effective date of the minimum efficiency requirements for single voltage external power supplies until July 1, 2007. Conair commends the Commission for its action in this regard and wholly supports the delay, for the reasons cited in our prior correspondence to the Commission in this regard.

While we also note that the Commission has not chosen to take action as Conair requested, to create an exception to the external power supplies minimum efficiency requirements for personal, limited-use massaging products, we will withhold further comment on this issue until after July 1, 2007.

Thank you for your attention to this correspondence. Should you have any questions or comments, please feel free to contact the undersigned.

Sincerely,

CONAIR CORPORATION

Jeffrey C. Brohel
Associate Counsel
