**Subject: STARWOOD POWER – MIDWAY PEAKING PROJECT, DATA ADEQUACY RECOMMENDATION (06-AFC-10)**

Staff has completed its data adequacy review of the Starwood Power - Midway (SPM) peaking electrical power plant Application for Certification (AFC) submitted on November 17, 2006. Staff has determined that the AFC does not contain all the information required by California Code of Regulations, Title 20, Section 1704, including Appendix B, for the 12-month AFC process. Of the 23 technical disciplines reviewed, we believe the information contained in the AFC is deficient in eight areas. The sections of the AFC that require additional information to meet data adequacy for the 12-month process are: air quality, biological resources, project overview, reliability, socioeconomics, traffic & transportation, transmission system engineering, and visual resources.

The proposed SPM project would be a simple cycle natural gas fired peaking power plant. It will have a nominal electrical output of 120 megawatts (MW) with construction planned to start in June 2008 and commercial operation planned by May 2009. The applicant has a 15-year contract with Pacific Gas & Electric (PG&E) as a result of its 2004 Request for Offers for new generation resources. The proposed SPM project would interconnect to the 115 kV bus at PG&E's Panoche Substation via a 300-foot generator tap line into the existing CalPeak Panoche generator tie line.

The proposed SP plant site is located on 5.6 acres within a 128-acre parcel located approximately 1 mile southwest of the intersection of West Panoche Road and South Fairfax Avenue, and approximately 2 miles northeast of the intersection of West Panoche Road and Interstate 5, in an unincorporated area of western Fresno County.

The 5.6 acres portion of the parcel is currently occupied by CalPeak Power and is used as a storage yard containing several large pieces of equipment and items used at the existing CalPeak Panoche peaking power plant located directly southwest and adjacent to the proposed SP plant site. The proposed SP plant site is owned by Starwood Power-Midway, LLC. The proposed Panoche Energy Center (06-AFC-5) site is nearby on the same 128-acre parcel.

Attachment A contains an overview of whether each technical discipline evaluated is adequate or

inadequate. Attachment B contains detailed data adequacy worksheets that describe staff's findings for each information requirement for the 12-month AFC process.

We have not received written comments from other agencies. The San Joaquin Air Valley Pollution Control District has indicated that they have received the Air Permit Application on November 22, 2006, but has not yet indicated whether it is complete.

At the Energy Commission's business meeting on January 3, 2007, staff will recommend that the Energy Commission not accept the AFC until all the additional information specified in Attachment B is supplied. Pursuant to California Code of Regulations, Title 20, Section 1709 (c), if the Energy Commission accepts staff's recommendation, the Energy Commission may use the attached Data Adequacy worksheets to indicate in writing those parts of the AFC that fail to meet the information requirements and the manner in which it can be made complete.

If you have any questions, please call Che E. McFarlin, staff's Project Manager, at (916) 651-0965.
