Subject: Walnut Creek Energy Park Project

Dear Mr. Hamblin:

The City of Industry Engineering department has reviewed the 16 development projects approved by the City of Industry within the 18 months prior to the filing of the Walnut Creek Energy Park AFC would generate additional vehicle trips to surface streets within the City. The City's individual review of each project concludes that the estimated number of vehicle trips generated by them collectively could be accommodated by the City's existing road system. The estimated additional vehicle trips generated by the proposed Walnut Creek Energy Park at operation could also be accommodated by the City's existing road system.

Please do not hesitate to call me at (626) 333-2211 if you have any additional questions.

Sincerely,

Troy Helling
Associate Planner
City of Industry
