Hi Tom:

Could you please consider this as a request for clarification of existing Informal Data Request SOCIO-1 ? A response by email would be fine, which we would then docket.

Thank you,

John

John,

I am responding to Victorville 2 Hybrid Power Project (07-AFC-01) CEC Staff Informal Data Request (Informal Data Request SOCIO-1) and would like further clarification. Staff would **like to have** all economic data presented in terms of a single common year and not just project capital costs which are in 2008 dollars. As second-best option, staff would **like to have** indicated the year, whatever that is, of all economic estimates. So for example, the year of construction economic estimates could be different than operations economic estimates. This would improve the accuracy of the Socioeconomic analysis and reflect the time value of money. Please forward this to Tom Barnett of Inland Energy, Inc. and ENSR.
