**SUBJECT: San Gabriel Generating Station Project 07-AFC 2**

Dear Mr. Yeh:

Environmental Health Services (EHS) has reviewed the application for adding two new combustion turbine generators (CT6s) adjacent to the existing Etiwanda Power Generating Plant.

1. EHS requires further noise assessment of the project to identify noise receptors and mitigations for existing and future land use surrounding the project.
2. EHS requires a water supply permit amendment to the existing water system regulated under the Safe Drinking Water Act.
3. EHS requires a cross connection survey with all backflow prevention devices identified or required to be installed for backflow (pressure and syphonage) protection.
4. Any food facilities planned for this project including vending of potentially hazardous foods must be approved and permitted by EHS.

If you have any questions, please call me at 909-387-4666.

Sincerely,

Scott R. Rose, REHS, MURP
