Subject: **CHULA VISTA ENERGY UPGRADE PROJECT, REVISED DATA ADEQUACY RECOMMENDATION (07-AFC-4)**

Staff's September 6, 2007 initial data adequacy review of the Chula Vista Energy Upgrade Project Application for Certification (AFC) determined that it did not meet all the requirements listed in Title 20, section 1704, and Division 2, Chapter 5, Appendix B of the California Code of Regulations for the 12-month process. Specifically, the AFC was deficient in 9 of 23 areas: Air Quality, Biological Resources, Cultural Resources, Land Use, Socioeconomics, Traffic & Transportation, Transmission System Design, Waste Management, and Water Resources. On September 14, 2007, MMC Energy, Inc. provided draft sections of the AFC Supplement to staff for review. Staff has reviewed the draft supplemental information and believes the AFC now meets the above-listed requirements in all nine of the previously deficient technical disciplines, and the project will be data adequate with the filing of one hundred and twenty-five copies of the AFC Supplement. Attached is a summary table and revised data adequacy worksheets for the nine technical disciplines previously determined to be data inadequate, reflecting that the supplemental information submitted by MMC Energy, Inc. achieves data adequacy. The one hundred and twenty-five copies of the AFC Supplement will be provided on September 24, 2007.

At the Energy Commission Business Meeting on September 26, 2007, I will recommend that the Energy Commission accept the Chula Vista Energy Upgrade Project AFC with the supplemental information as complete, and request that a Committee be appointed. If you have any questions, please call Christopher Meyer, staff's Project Manager, at (916) 653-1639.
