Subject: Revised Air Quality Analysis for Humboldt Bay Repowering Project

Rick/Jason - enclosed for your information is the revised air quality analysis for the Humboldt Bay Repowering Project. As requested by the District and CARB staff, we are providing a complete, clean, updated version of the air quality section and air quality appendices of the AFC; in a separate e-mail, we will provide a second version of the same material shown with tracked changes. The updated air quality analysis is based on the methodology described in our July 17 revised modeling protocol, as amended to reflect verbal comments subsequently received from the District. We believe that, with this revised analysis, the District has all of the information it has requested for preparation of a Preliminary Determination of Compliance. We look forward to receiving the PDOC within the next few weeks. If you have questions or need additional information, please don't hesitate to contact me via e-mail, or at my office or cell phones.
