Docket No.
06-AFC-10
PETITION FOR INTERVENTION

Petitioner, International Power Services Company, Inc., states:

1. Petitioner, **International Power Services Company, Inc.**, petitions to intervene in the above-entitled proceeding.
2. Petitioner has an interest in the proceeding in that the Petitioner is in the process of bringing to the market the Simplified Combined Cycle (SCC) technology that lowers the heat rate of simple cycle power plants by 20% to 30% depending upon the combustion turbine design. The SCC technology package enables a simple cycle plant to make more efficient use of natural gas, a serious issue associated with peaking plants according to the California Energy Commission. Moreover, because less natural gas is burned for the same amount of power generated, there is a one-to-one reduction in the amount of GHGs emitted from the simple cycle plant. Finally, the SCC technology increases the nominal capacity of the peaking plant and lowers NOx to between 2 ppmvd and 5 ppmvd before the use of additional control technologies such as SCR.

Petitioner does not oppose the project but desires to present for the record information about the SCC technology.

3. Petitioner does does not wish to reserve the right to present evidence and to cross-examine witnesses.
4. Petitioner will be represented by John Redding, Senior Vice President.
