<b>DOCKET</b>	
<b>06-AFP-1</b>	
DATE	<sup>OCT</sup> 2007
RECD.	OCT 12 2007

**Date 10/12/07**

Docket number 06-AFP-1  
Alternative Fuels Transportation Plan

Commissioners Boyd and Byron,

Primafuel respectfully submits the following comments regarding the October 2007 State Alternative Fuels Plan:

The contents of the State Alternative Fuels Plan are very thorough and well considered. The extra effort taken to ensure technology-neutrality is to be applauded. It is in this spirit in which Primafuel believes particular attention be paid to 'upstream' low-carbon fuels infrastructure. In particular, new infrastructure dedicated to the high-efficiency (and low-emissions) distribution of low-carbon fuels. Infrastructure projects which are focused on the high-efficiency distribution of low-carbon fuels should be supported by the State, especially when these projects are aimed at alleviating key bottle-necks and supply-risks in California's fuel network.

Best regards,

Rahul Iyer  
Executive Vice President  
Primafuel, Inc.
