COMPLETED

Re: Deficient or Incomplete Application for Confidentiality
03-RPs-1078

Dear Mr. Blevins:

By letter dated October 19, 2007, Southern California Edison Company ("SCE") received a notice of deficiency related to an application for confidentiality for the protection of information provided as part of a Supplemental Energy Payment application. The letter indicated that the application did not have an original signature and was not accompanied by the requisite number of copies, and allowed SCE to cure these deficiencies. As per the October 19 letter, SCE has enclosed the necessary documents to cure these deficiencies. If any further information is needed, please do not hesitate to call me.

Very truly yours,

William V. Walsh
