Subject: re "2008 Building Energy Efficiency Standards Docket # 07-BSTD-1."

The state controlled programmable thermostat for houses is one more large pile of manure from secular gods and is totally unnecessary. If you are so worried about lack of energy in this state close all state offices, reduce legislative sessions to two days a year, and make the governor pay for housing and expenses out of his own pocket. Nothing in the world causes contempt of law and politicians like ridiculous laws and politicians.
