Subject: 2008 Building Energy Efficiency Standards Docket #07-BSTD-1

I understand California citizens may be headed for a disaster with Big Brother's push for Thermostat Control. This is an outrageous plan, an invasive and unconscionable means of controlling and determining our citizens needs at the whim of politicians and energy officials. A law such as this would be fascist to say the least. This panic for global warming is a manipulation and a scam.

I need to hear from you the status, deadlines and whatever steps our citizens can take to stop this dead in it's tracks.
