To: Chris Gekas
Date: 1/10/2008 1:03 PM
Subject: Fwd: Programmable communicating thermostats (mostly residential) for demand response control by utilities

>>> David McMillion <david_mcmillion@sbcglobal.net> 1/9/2008 6:20 PM >>>
This is my protest to this Communistic/ Socialistic Plan.

There are so many things that can and should be done before you resort to any measure such as having "Big Brother" set out temperature in our homes. The next thing that I can for see is that you will want every kid in the state to be doing homework so that you will be able to turn of individual T.V.s. What is going on with you people ?

I was in the construction business my entire working career and there are so many wasteful things that are still being done. Get real.

Respectfully,

David McMillion
