"Docket No. 07-BTSD-I."

You people are insane. This is the sort of thing that will continue to drive people (except illegals) out of the state. Thankfully, I left California several years ago. It is one more example of government and other entities going where they have no business going. There are those of us that will never accept that you can come into our homes and tell me how to live in it. I can't believe the CEC really believes that people will accept this.

Maybe they will

Like lambs to the slaughter.....
