Subject: Docket No. 07-BTSD-1

This proposal confirms the opinions held by voters of the 49 other states that California is governed by morons.

Those whose idea this is should be sent to Cuba with instructions to imprison them in the coldest cell available, because they have no business living in a free country.

The idea that the public should be controlled in the use of energy by a central authority is idiotic rather than utopian. The government cannot even control its caged tigers at the San Francisco zoo.

Let's move on to issues that actually exist, shall we?
