I would not have believed that you were going to control thermostats except for the fact that I spent 7 long years in your God forsaken State. Why don't you try getting rid of all the illegals in Kalifornia? By sending all the illegals home, you would have an abundance of electricity never having to go through a brownout. You already have a constant brownout. Why don't you Liberal Bastards leave the legal population alone? I think you want a revolt or to possibly start a civil war within Kalifornia.
