This proposal to allow a government agency to remotely control temperature and electrical use in private homes is an OUTRAGE! This is a GROSS VIOLATION of our constitutional rights to freedom, property, and privacy! Instead of intruding on our lives and in our homes, why don't you prevent electricity shortages by BUILDING MORE AND BETTER POWER PLANTS? With this kind of asinine Big Brother intrusion, you won't need to worry about future power outages because there will be a massive exodus from the insanity that has become California.

Unspeakably outraged,  
Susan French
