**Subject:** Docket No. 07-BTSD-1 NO WAY!

Dear Dept. of Energy,

I read the story on this subject in Human Events, and noted that the survey on public reactions came out 95% in outraged shock at the contemptible encroachment on the rights of free American citizens embodied in this unacceptable plan. You want to broadcast a signal into MY home and change MY thermostat to suit YOURSELF and limit MY use of electricity that I'M PAYING FOR?

And, I noticed the article even included plans to encroach on MY use of MY OWN COMPUTER!  
WOW! SEIG HEIL! SALUTE, COMRADE! ETC., ETC., ETC.! I thought all the Communist dictatorships were somewhere else!

FORGET IT! If we have to endure periods of one hour on a given day in rolling blackouts because of POLITICAL pressures of so-called "global warming" holding back all our energy activities, then we will still keep on operating our homes according to our own needs. As for the so-called "Green" thing, Al Gore can't tell life-cycle gas CO<sub>2</sub> from smog-producing pollutants, nor does he know that the coverage of 617 of the earth by water and strong thermal feedback from water vapor are the prevailing controls of global temperatures! (Besides the variances in the sun's output, of course.)

The U.S. Senate recently issued a stinging report on more than 400 scientists who strongly dispute the news media "global warming" fiasco, and no newspaper dared even mention it! It's a farce, a con game, and I do know what I'm talking about. I've communicated with top atmospheric scientists\* and IPCC reviewers, who agreed with me, and I've studied the technical reports first hand.

Eugene Keech  
Retired electronic engineer

\*Including Richard Lindzen, Phd; S. Fred Singer, Phd; Arthur Robinson, Phd [author of an excellent report on the atmospheric effects of CO<sub>2</sub>, which was supported by thousands of scientists]. Dr. Robinson's fully detailed technical report exposed political manipulations of the IPCC, which included deliberately altered computer data to fabricate support of CO<sub>2</sub>-caused global warming, etc.
