Subject: Thermostat

I object to the use of remote controlled thermostats!
If I'm willing to pay for the power I want to use you should not have control of it. What you should be doing is getting us more power plants. Here in the Fresno area it has been talked about getting nuclear power plants and you should be pushing for us to get it. If we are in short supply of power how about more dams, they are needed for power and our water shortage

Ron
