Subject: Docket No. 07-BTSD-1.

To: the dark one of **Orwellian** Nightmares,

Re. Docket No. 07-BTSD-1.

So let me get this right? You want to put FM transmitters in my home so the California State Gov. could control my heating and cooling and have the potential to control other devices?!!!!!!!!!!!! (today - WND). I pay for my **heating/cooling** and control it myself. How about you just do your job and stop allowing our state to get ripped off?!

Let's you get this right: I'm pretty docile about cockamamy ideas some people have. But I will go into a political rage (and to the political mat) if I read or hear about any of you suggesting this kind of **crap** at any CA State sponsored meeting while I'm alive.

You pass my message on to the current Gov. "ARE YOU CRAZY? - Even allowing those you are responsible for to suggest such a 'UNION OF SOVIETS - Big Brother - STUPID' idea puts one more nail in your political coffin. If this gets into the major newspapers, I predict this will politically finish you."

from, Utah Chta **Nerv**

P.S. I assume the article I read in WND about your wanting to commit political suicide was more of an April Fool's joke, but with the kinds of people who are finding their ways into political positions...you know, I just thought I should send you this terse, livid note
!
I'll sit in front of **Safeway** and take signatures (and I'll get 'em) until hell freezes over...
