Docket No. 07-BTSD-1." Is only slightly to the left of socialism. The problem with this state is we refuse to build new power plants and instead crutch the system with these hair-brained social plans. Control of my heating, cooling and appliances is not something left to a utility or the STATE. Who intends to pay for these systems? Why, the homeowner! This is another added cost imposed on us who live in this rapidly approaching communism state.

Stephen Varner
