Honestly! Enough is enough! Are you going to set timed locks on their refrigerators next, allowing them to eat only at certain times of the day? Or how about little timed commuter devices that stop the car if they drive too far and use up their allotment of gas?

Stop with the **Orwellian** intrusion into peoples' lives!

Educate people. Encourage them to save energy for their own financial benefit! Measures like this only foment anger!

We do not live in CA., but if measures like this are implemented in CA., I am sure that the rest of the country will follow suit. (I DO have a mother-in-law and a brother-in-law living there.)

Are we a free people anymore? If the government can control what we do inside our homes--right down to how much energy we can use, then I think that we may as well take down the "red-white-and-blue" and run up a communist flag!

G. Peterson
