**Subject:** Thermostat Control

In my opinion , any attempt by the government to control my living environment through manipulation of my thermostat is completely Orwellian and goes against the basic pursuit of life, liberty and happiness. My wife and I are adamantly opposed to this government intervention.

Government would be better suited to reduce the corporate tax rates to allow businesses to invest in R&D to discover, invent or refine existing methods of producing and delivering energy to the people.

Regards,

Max and Terri Fuentes
