Subject: control thermostats in homes?

Dear Sir,

Re: Docket No. 07-BTSD-1:

Claudia Chandler is possessed or completely out of her mind, you choose.

The 2008 Building Efficiency Standards implementing the Programmable Communication Thermostat, or PCT, is only useful to control the masses in California and bring them under the tyranny of the New World Order. This won't save money or lives. This *Orwellian* system is to STEAL the money and the lives (of dissenters) for the best interests of the Bankers and Big Business.

Have you thought of deporting all your privileged ILLEGAL aliens to keep a billion or so dollars in your state coffers? California is the laughing stock of the world!

You must really think all Californians are wimps.

Reject this unconstitutional proposal now!

Sincerely,

Sally
