Subject: Remote thermostat control

Chris,

I would like to express my opposition to the Programmable Communicating Thermostat provisions in the update to Title 24, as proposed within the 2008 Building Energy Efficiency Standards Docket # 07-BSTD-1. I do not think that power authorities should usurp my right to set my house temperature as I see fit, depending on my health, , local micro-environment, comfort and ability to afford the energy costs.

Please act to remove this change from the update to Title 24.

Most Respectfully Yours,
Scott Burnside
Rescue, California
